

Rule #12 — Kb end-Swage = 45/cos(angle from horizontal)

Example: HG260001 | plan GF-LBW-70.075 | frame PK4-L4 | stick Kb1

Kb end-Swage span = 45/cos(angle from horizontal). Curve fit, not a HYTEK constant.

Stick totals on this example:

- Matched ops: 3
- Extras (codec emits, Detailer doesn't): 2
- Missing (Detailer has, codec doesn't): 3

How to read:

- Top strip = ops the CODEC currently emits but Detailer's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailer's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
