

Rule #15 — H end-Swage 43mm (cripple-role)

Example: HG260001 | plan GF-LBW-70.075 | frame PK4-L4 | stick H1

H end-Swage 43mm rule — possibly dead code (the HEADER_ROLES rule always wins).

CODEC EMITS

(extra)
Detailer
doesn't
have these

DETAILER REF

(missing)
codec
should have
emitted these

LipNotch 1279..1360

Stick totals on this example:

- Matched ops: 19
- Extras (codec emits, Detailer doesn't): 1
- Missing (Detailer has, codec doesn't): 1

How to read:

- Top strip = ops the CODEC currently emits but Detailer's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailer's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
