

Rule #19 — Short T sub-plate — Dimple@58.5 LBW only (start)

Example: HG260001 | plan GF-LBW-70.075 | frame PK4-L4 | stick T2

Short T sub-plate above header — paired Dimple@58.5 LBW only. Why LBW-only?

CODEC EMITS

(extra)
Detailer
doesn't
have these

InnerService@166

DETAILER REF

(missing)
codec
should have
emitted these

Stick totals on this example:

- Matched ops: 26
- Extras (codec emits, Detailer doesn't): 1
- Missing (Detailer has, codec doesn't): 0

How to read:

- Top strip = ops the CODEC currently emits but Detailer's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailer's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
