

Rule #38 — 89mm B with gauge<1.0 gate

Example: HG250082 | plan GF-NLBW-89.075 | frame N3 | stick B2

89mm B with gauge<1.0 gate — single-corpus. Do thicker plates skip slab bolts?

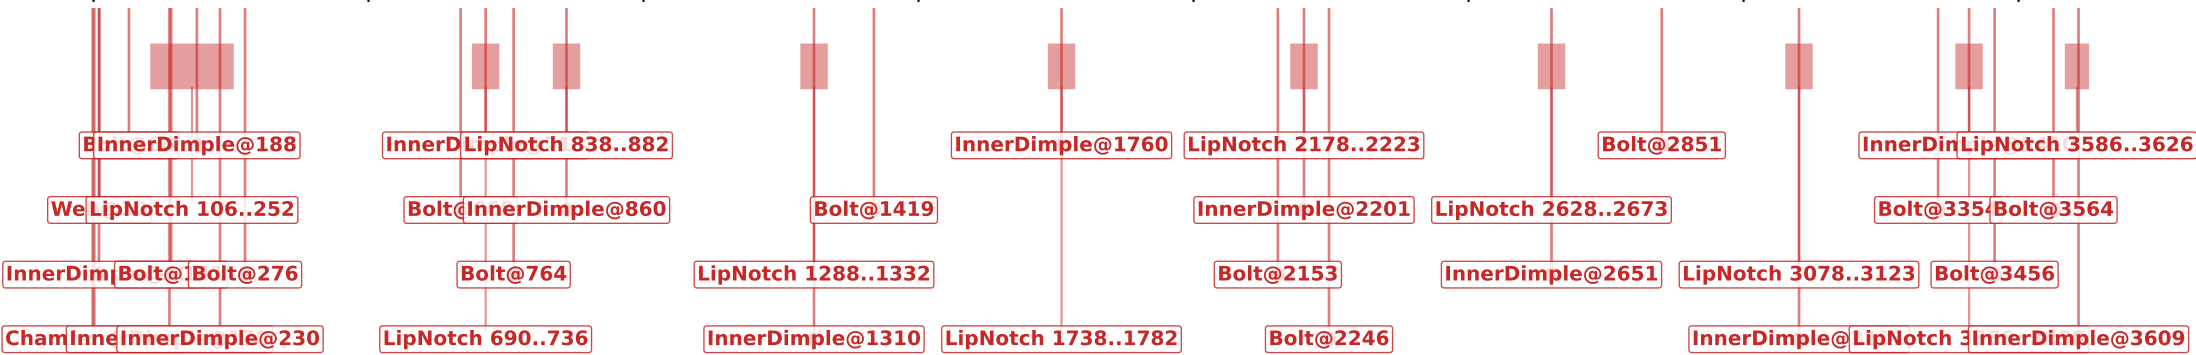

CODEC EMITS

(extra)
Detailer
doesn't
have these

DETAILER REF

(missing)
codec
should have
emitted these

Stick totals on this example:

- Matched ops: 1
- Extras (codec emits, Detailer doesn't): 36
- Missing (Detailer has, codec doesn't): 37

How to read:

- Top strip = ops the CODEC currently emits but Detailer's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailer's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
