

Rule #60 — 89mm header always paired 58.5

Example: HG260012 | plan TH01-GF-LBW-89.075 | frame L1001 | stick H1

89mm header — paired 58.5 ALWAYS, regardless of LBW/NLBW. Is that real?

CODEC EMITS

(extra)
Detailer
doesn't
have these

DETAILER REF

(missing)
codec
should have
emitted these

Stick totals on this example:

- Matched ops: 12
- Extras (codec emits, Detailer doesn't): 4
- Missing (Detailer has, codec doesn't): 1

How to read:

- Top strip = ops the CODEC currently emits but Detailer's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailer's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
