

Rule #61 — Wall brace W chamfer — 28° threshold

Example: HG260001 | plan GF-LBW-70.075 | frame PK4-L27 | stick W2

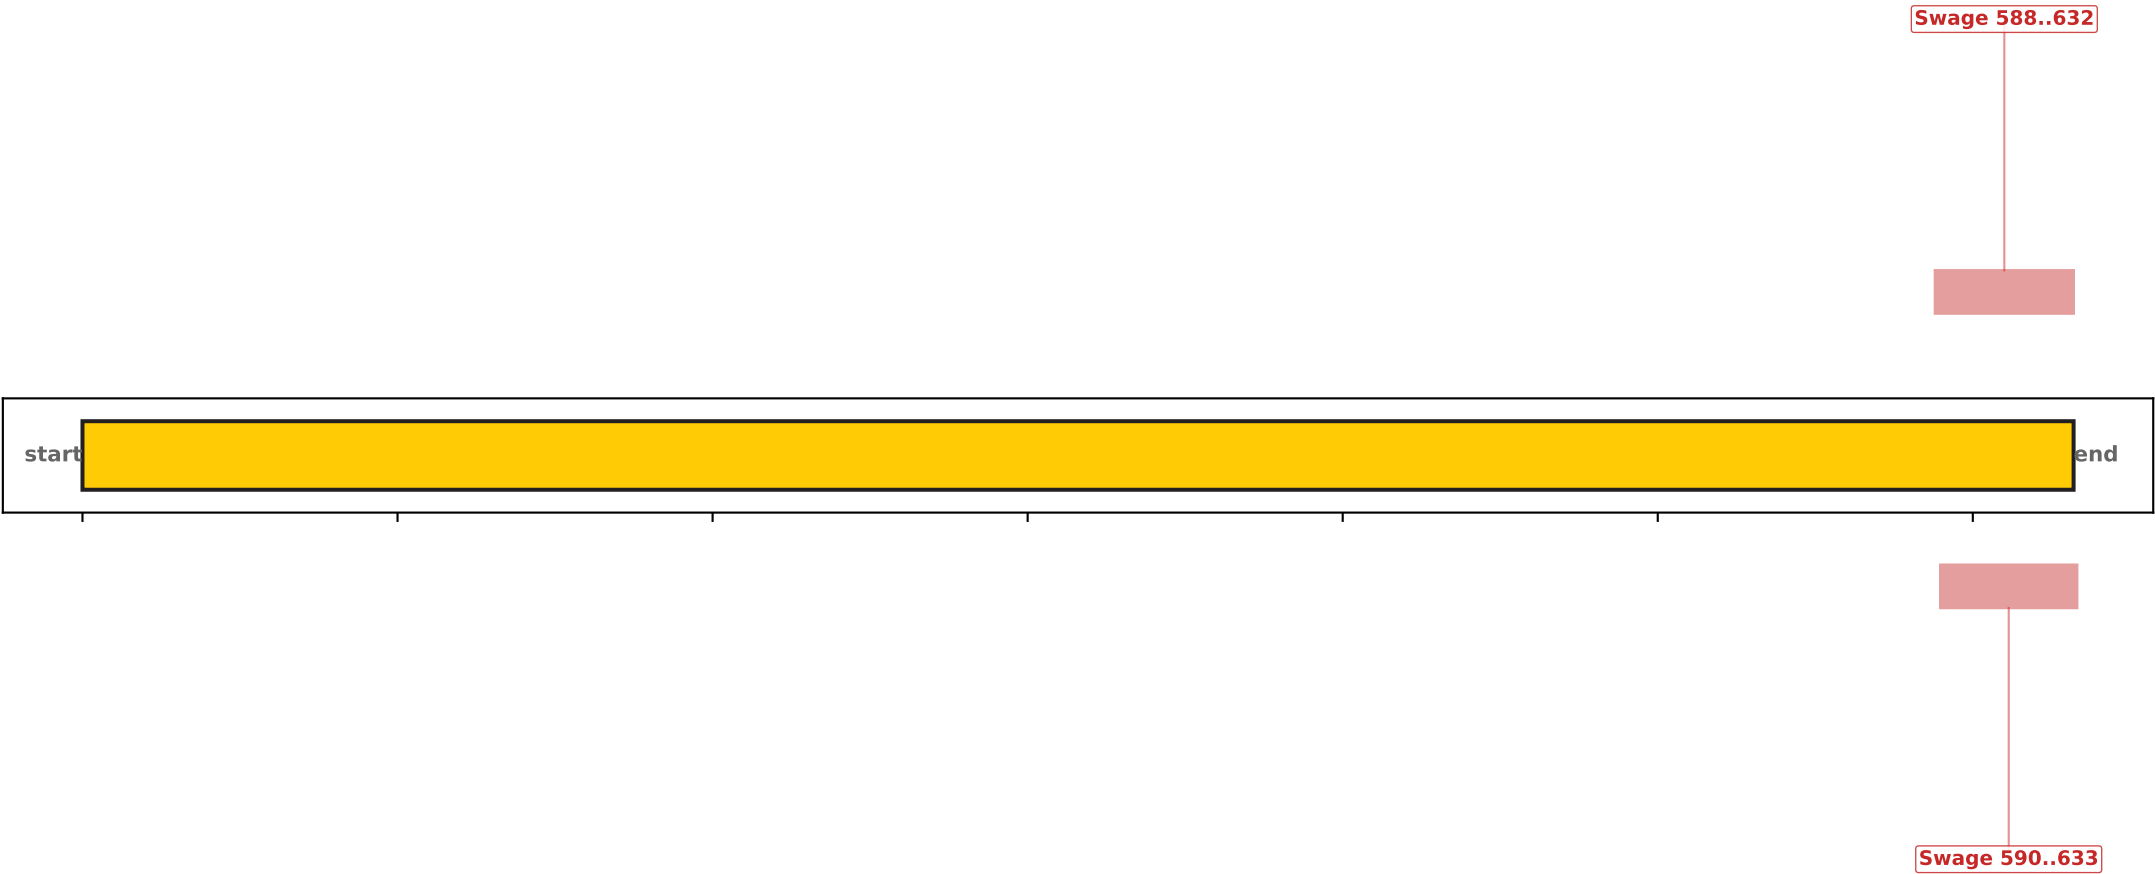

Wall brace W chamfer threshold ~28° from vertical. Is that the actual rule?

CODEC EMITS

(extra)
Detailer
doesn't
have these

DETAILER REF

(missing)
codec
should have
emitted these

Stick totals on this example:

- Matched ops: 3
- Extras (codec emits, Detailer doesn't): 1
- Missing (Detailer has, codec doesn't): 1

How to read:

- Top strip = ops the CODEC currently emits but Detailer's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailer's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
