

Rule #74 — 89mm sill L paired Dimple@58.5 (start)

Example: HG260002 | plan GF-LBW-89.075 | frame L24 | stick L3

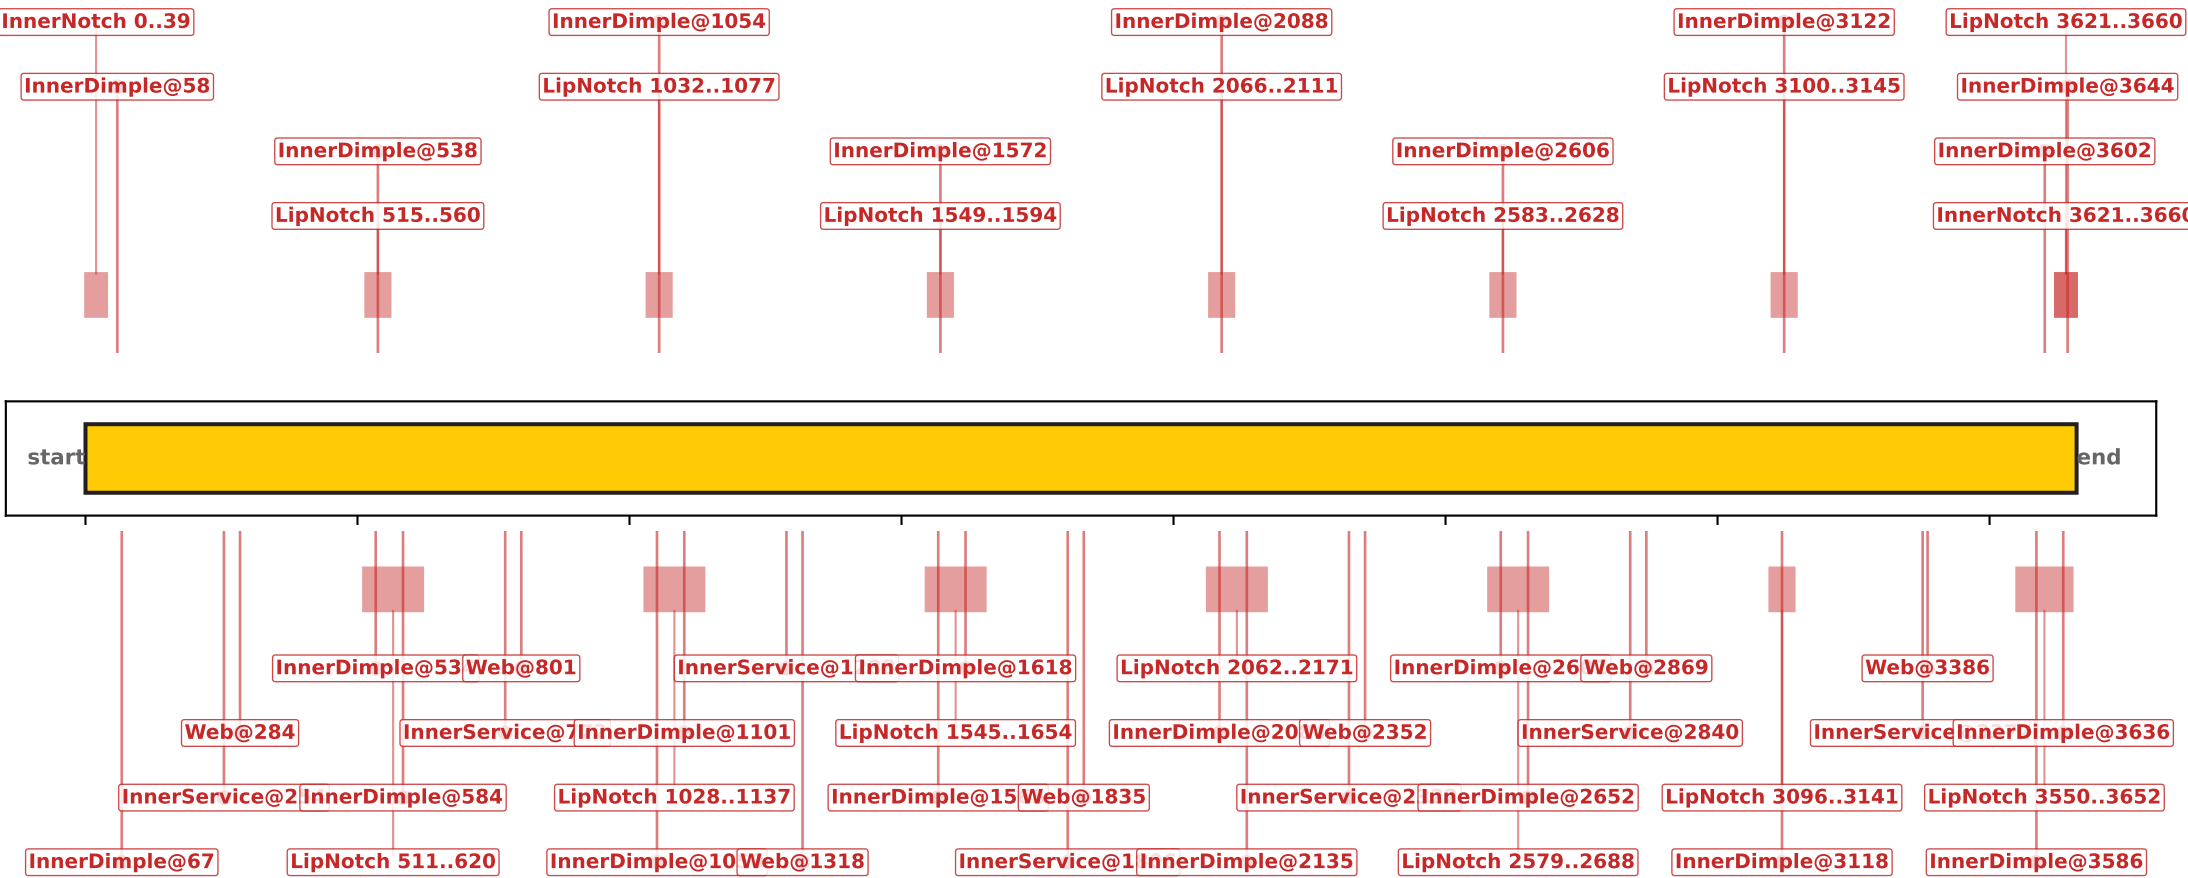

89mm sill — paired Dimple@58.5 always. Why 89mm specifically?

CODEC
EMITS

(extra)
Detailer
doesn't
have these

DETAILER
REF

(missing)
codec
should have
emitted these

Stick totals on this example:

- Matched ops: 2
- Extras (codec emits, Detailer doesn't): 18
- Missing (Detailer has, codec doesn't): 35

How to read:

- Top strip = ops the CODEC currently emits but Detailer's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailer's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
