

Rule #87 — RP simplifier — bimodal, hurts half the corpus

Example: HG260006 | plan GF-RP-70.075 | frame R1 | stick T1

RP simplifier *HURTS* this case (33% → 69% if disabled). Stud-style caps not chord-style.

Stick totals on this example:

- Matched ops: 0
- Extras (codec emits, Detailler doesn't): 26
- Missing (Detailler has, codec doesn't): 23

How to read:

- Top strip = ops the CODEC currently emits but Detailler's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailler's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
