

Rule #91 — Wall-service simplifier — bimodal

Example: HG260010 | plan GF-LBW-70.075 | frame L39 | stick S7

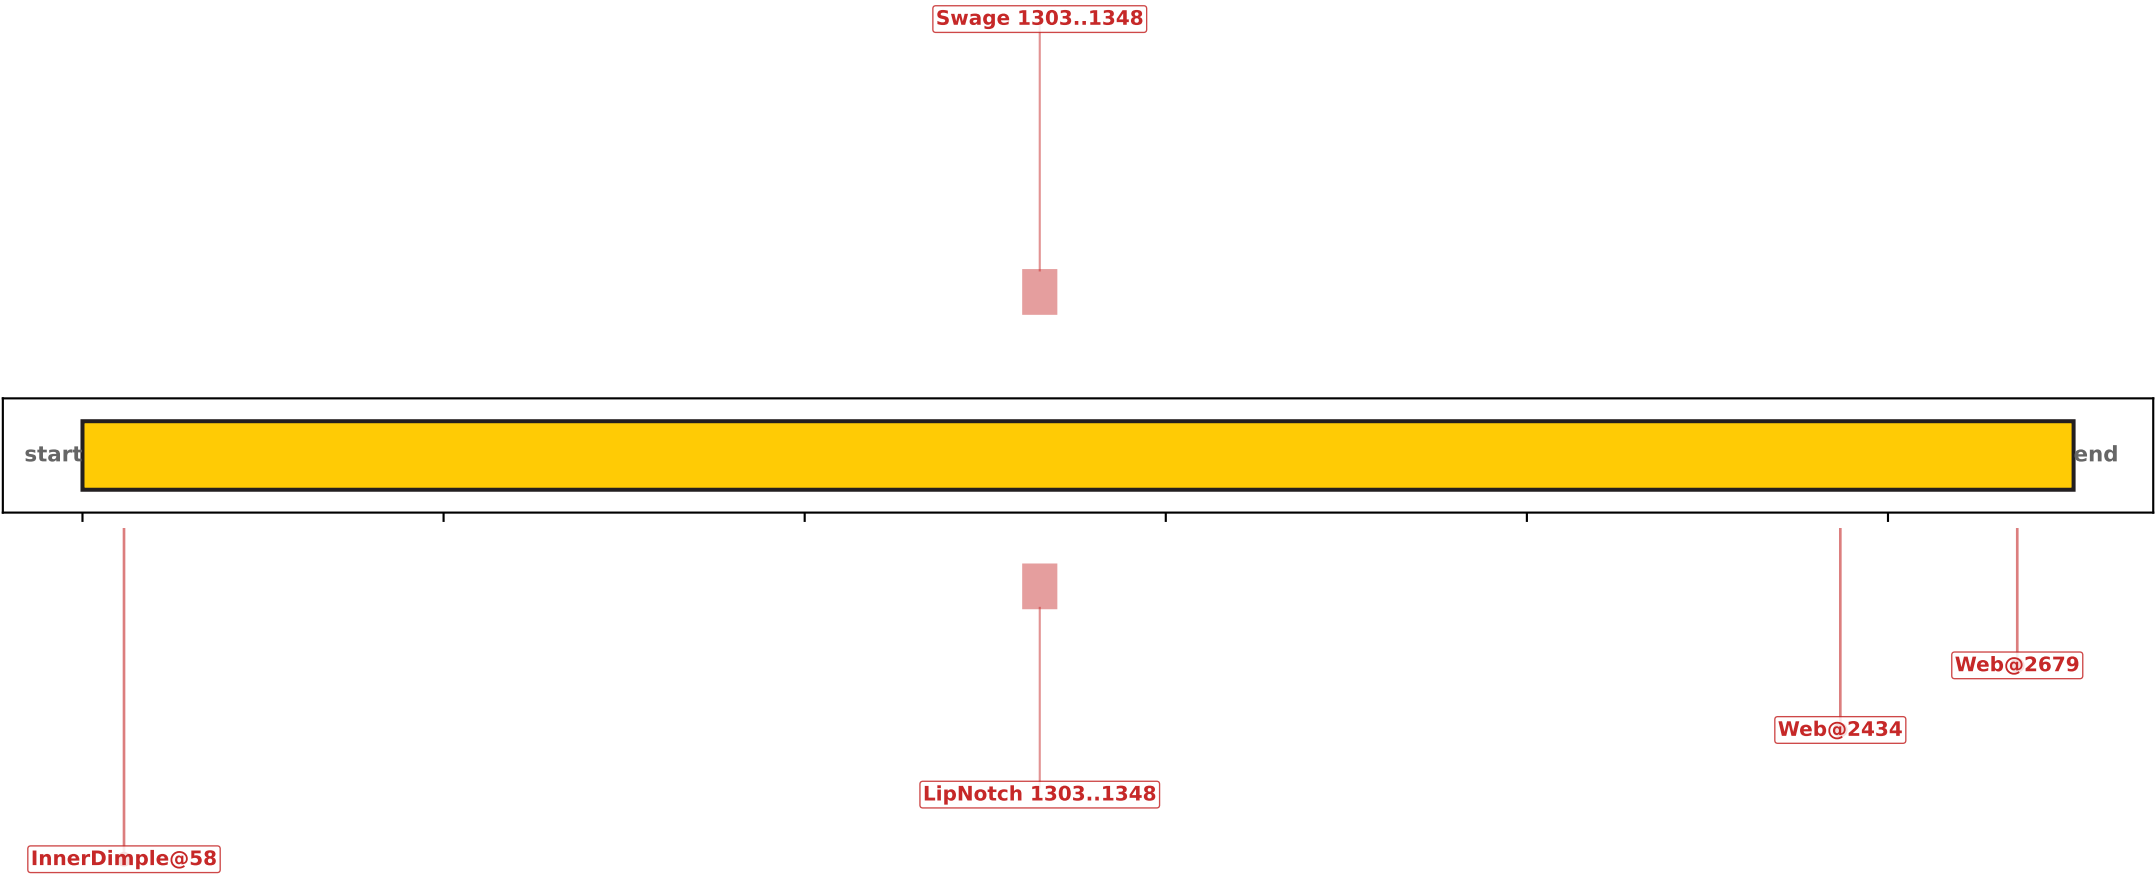

Wall service simplifier — over-emits ~40× on small jobs.

CODEC EMITS

(extra)
Detailer
doesn't
have these

DETAILER REF

(missing)
codec
should have
emitted these

Stick totals on this example:

- Matched ops: 7
- Extras (codec emits, Detailer doesn't): 1
- Missing (Detailer has, codec doesn't): 4

How to read:

- Top strip = ops the CODEC currently emits but Detailer's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailer's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
