

Rule #86 — Truss panel-points NOT EMITTED — biggest single gap

Example: HG250011 | plan GF-TIN-70.075 | frame PC1-1 | stick T2

Truss panel-points NOT EMITTED. Worth +13pp on TIN. The bottom strip's red ops show every InnerDimple/LipNotch the codec is missing at each Web-stick projection.

Stick totals on this example:

- Matched ops: 3
- Extras (codec emits, Detailer doesn't): 11
- Missing (Detailer has, codec doesn't): 16

How to read:

- Top strip = ops the CODEC currently emits but Detailer's reference doesn't have (red = wrong-emit).
- Bottom strip = ops Detailer's reference has but the CODEC doesn't emit (red = miss).
- The yellow bar in the middle = the stick body, drawn to scale.
- Spans (Swage/LipNotch/InnerNotch) are coloured rectangles.
- Points (InnerDimple/Bolt/Web) are vertical lines + dots.
- Anchors (Chamfer @start/@end) are at the very ends.
